ENGINEERING STRUCTURES

Index to Volume 21 (1999)

Number 1 (January) pp 1–98
Number 2 (February) pp 99–194
Number 3 (March) pp 195–290
Number 4 (April) pp 291–382
Number 5 (May) pp 383–468
Number 6 (June) pp 469–556
Number 7 (July) pp 557–656
Number 8 (August) pp 657–808
Number 9 (September) pp 809–888
Number 10 (October) pp 889–970
Number 11 (November) pp 971–1044
Number 12 (December) pp 1045–1130

Article Index

Number 1

Editorial 1
Announcement 3
Some aspects of composite circular sewer linings under installation conditions
M. N. Pavlović, S. Arnaout and S. M. Seraj 5
The prestressing of shell roofs
F. C. Mbakogu and M. N. Pavlović 16
Effect of force limiting devices on behaviour of space trusses
A. El-Sheikh 34
Mode localization in multispan cable systems
N. Poovarodom and H. Yamaguchi 45
Flexural–torsional postbuckling analysis of centrally compressed bars with open thin-walled cross-section
G. I. Ioannidis and A. N. Kounadis 55
Seismic behaviour of cable-stayed bridges under multi-component random ground motion
S. M. Allam and T. K. Datta 62
Optimal design of arch bridges by integrating genetic algorithms and the mechanism method
D. M. Peng and C. A. Fairfield 75
Lateral performance of cold-formed steel-framed domestic structures
E. F. Gad, C. F. Duffield, G. L. Hutchinson, D. S. Mansell and G. Stark 83
Calendar 96

Number 2

Reversed cyclic response of monolithic and slitted reinforced concrete masonry wall-piers
Y. H. Chai and L. L. Yaw 99
Draught control for floating vessels using pneumatics
A. A. Fajinmi and D. T. Brown 112
Treatment of mixed and nonuniform boundary conditions in GDQ vibration analysis of rectangular plates
C. Shu and C. M. Wang 125
Dynamic response of damper-connected adjacent buildings under earthquake excitation
Y. L. Xu, Q. He and J. M. Ko 135
Applications of wavelet transforms in earthquake, wind and ocean engineering
K. Gurley and A. Kareem 149
Long-term deflection of RC beams under constant loads
W. A. M. Alwis 168
Fire resistance of composite floor slabs using a model fire test facility
M. A. H. Abdel-Halim, M. R. Hakmi and D. C. O'Leary 176
Integrated structural and control optimization of intelligent structures
Z. Wang, S. Chen and W. Han 183
Book Review 192
Calendar 193

Number 3

Uncertainty analysis of strength and ductility of confined
reinforced concrete members
A. J. Kappos, M. K. Chryssanthopoulos and C. Dymiotis 195
On the formulation of geometrically nonlinear 3D-Rebar-elements using the enhanced assumed strain method
W. Sprenger and W. Wagner 209
Development of a case representation strategy for a bridge design case base
C. J. Moore and M. S. Lehane 219
Plate reinforced concrete beams: experimental work
N. K. Subedi and P. S. Baglin 232
Transient analysis of thin-walled structures using macro spline finite elements
S. W. Yuen and G. M. Van Erp 255
Geometrically nonlinear analysis of a simply-supported hip-truncated combined parabolical cylinder roof
Y. Lai, A. Sun, Y. Zhu and Z. Wu 267
Finite element static and dynamic analyses of folded plates
A. Samanta and M. Mukhopadhyay 277
Calendar 288

Number 4

Effectiveness of TLCD on various structural systems
T. Balendra, C. M. Wang and G. Rakesh 291
Nonlinear seismic response of concrete gravity dams with dam–reservoir interaction
M. Ghaemian and A. Ghobarah 306
Characteristics of multiple tuned liquid column dampers in suppressing structural vibration
H. Gao, K. S. C. Kwok and B. Samali 316
Semi-continuum seismic analysis of soil–building systems
A. Kiefer and P. Léger 332
Use of the active member concept in vibration mitigation of seismic structures
L. Y. Lu, J. J. Bain and L. L. Chung 341
Design guide for steel frames using advanced analysis program
S.-E. Kim and W.-F. Chen 352
Shaking table and pseudodynamic tests for the evaluation of the seismic performance of base-isolated structures
W.-J. Chung, C.-B. Yun, N.-S. Kim and J.-W. Seo 365
Calendar 380

Number 5

A parametric study of the non-linear dynamic behaviour of an offshore jack-up unit
M. S. Williams, R. S. G. Thompson and G. T. Houlsby 383
Failure mode and strength of space truss compression chord members
A. El-Sheikh 395
An evaluation of fracture mechanics quarter-point displacement techniques used for computing stress intensity factors
B. D. Fehl and K. Z. Truman 406
Response of a buried structure to surface repetitive loading
A. N. Dancygier and Y. S. Karinski 416
Seismic analysis and response of multistory semirigid frames
J. C. Awkar and E. M. Lui 425
Elastic buckling of unilaterally constrained rectangular plates in pure shear
S. T. Smith, M. A. Bradford and D. J. Oehlers 443
Mass dampers and their optimal designs for building vibration control
C. C. Chang 454
Book Reviews 464
Calendar 466

Number 6

Semi-active control systems for seismic protection of structures: a state-of-the-art review
M. D. Symans and M. C. Constantinou 469

Computer-assisted generation of yield-line patterns for uniformly loaded isotropic slabs using an optimisation strategy
A. Thavalingam, A. Jennings, D. Sloan and J. J. McKeown 488
Rehabilitation of the spillway of Sama El-Serhan dam in Jordan, using roller compacted concrete
M. A. H. Abdel-Halim, M. A. Al-Omari and M. M. Iskender 497
Free vibration analysis of multi-storey buildings with narrow rectangular plane configuration
Q. S. Li, J. Q. Fang and A. P. Jeary 507
Multiobjective and multilevel optimization for steel frames
G. Li, R.-G. Zhou, L. Duan and W.-F. Chen 519
On the solution of limit load and reference stress of 3-D structures under multi-loading systems
H. F. Chen, Y. H. Liu, Z. Z. Cen and B. Y. Xu 530
Interaction of bending and stretching actions in shallow translational shells with various Gaussian curvature types
F. C. Mbakogu and M. N. Pavlovic 538
Book Reviews 554
Calendar 555

Number 7

Physical instability and geometric effects in frames
G. Bolzon and F. Tin-Loi 557
On laminated composite plates with integrated sensors and actuators
J. N. Reddy 568
Evaluation of laminated rubber bearings for seismic isolation using modified macro-model with parameter equations of instantaneous apparent shear modulus
G.-H. Koo, J.-H. Lee, B. Yoo and Y. Ohtori 594
Supplemental damping for seismic strengthening: a case study
D. C. Rai 603
Out-of-plane distortional buckling of T-section ringbeams clamped at inner edge
J. G. Teng and F. Chan 615
Mean wind pressures on flat roof corners affected by parapets: field and wind tunnel studies
T. Stathopoulos, R. Marathe and H. Wu 629
Fatigue properties of orthotropic decks on railway bridges
L. Fryba and L. Gajdoš 639
Book Review 653
Calendar 654

Number 8

Special Issue on Tension Structures
Editorial 657
Tension structures for solar electricity generation
J. Schlaich 658
Form and function of tensile structures for permanent buildings
H. Berger 669
Engineering analysis of tension structures: theory and practice
D. S. Wakefield 680
Formulation of constitutive equations for fabric membranes based on the concept of fabric lattice model
S. Kato, T. Yoshino and H. Minami 691
About formfinding of double-curved structures
K. Linkwitz 709
Optimum shapes of a cable dome structure
M. Kawaguchi, I. Tatemichi and P. S. Chen 719
Analytical method of structural behaviours of a hybrid structure consisting of cables and rigid structures
Y. Hangai and M. Wu 726
Recent evolution of cable-stayed bridges
M. Virlogeux 737
The role of string in hybrid string structure
M. Saitoh and A. Okada 756
Dynamic characteristics of a semi-rigid hanging roof structure composed of glulams and steel plate
S. Ban, S. Motohashi, A. Yoshida and H. Tsubota 770
Design and construction of a double membrane air-supported structure
K. Ando, A. Ishii, T. Suzuki, K. Masuda and Y. Saito 786
The role of cables in large span spatial structures: introduction of recent space structures with cables in Japan
O. Hosozawa, K. Shimamura and T. Mizutani 795
Calendar 805
Announcement 807

Number 9

Obituary 809
Evaluation of the total ductility in steel structures through a nonconvex energy optimization approach
E. S. Mistakidis 810
Evaluation of behaviour factors on the basis of ductility and overstrength studies
A. J. Kappos 823
Impact response of high speed rail bridges and riding comfort of rail cars
J.-D. Yau, Y.-B. Yang and S.-R. Kuo 836
Elastic buckling and postbuckling behaviour of widely-stiffened conical shells under axial compression
A. Spagnoli and M. K. Chryssanthopoulos 845
The influence of stiffness and strength eccentricities on the inelastic earthquake response of asymmetric structures
M. N. Bugeja, D. P. Thambiratnam and G. H. Brameld 856
Geometrical non-linear analysis of tensegrity systems
K. Kebiche, M. N. Kazi-Aoual and R. Motro 864
Seismic study of an historic covered bridge
C. C. Spyrakos, E. L. Kemp and R. Venkatareddy 877
Book Reviews 883
Calendar 887

Number 10

New buckling approximations for T-section ringbeams simply-supported at inner edge
J. G. Teng and F. Chan 889
Experimental investigation on bolted moment connections among cold formed steel members
K. F. Chung and L. Lau 898
Modelling of reinforced concrete structural walls
A. Ghobarah and M. Youssef 912
Analysis of ductile fracture in damaged pipelines by a geometric parameter method
A. Corigliano, G. Maier and S. Mariani 924
Experimental and theoretical investigation on the shear of steel fibre reinforced concrete beams
D. H. Lim and B. H. Oh 937
The behaviour of concrete columns with interlocking spirals
Jin-Keun Kim and Chan-Kyu Park 945
Model of damage for steel frame members
P. Inglessis, G. Gómez, G. Quintero and J. Flórez-López 954
Book Reviews 965
Calendar 968

Number 11

Dynamic analysis of reinforced concrete frames including joint shear deformation
A. Ghobarah and A. Biddah 971
Dynamic instability of layered anisotropic composite plates on elastic foundations
B.P. Patel, M. Ganapathi, K.R. Prasad and V. Balamurugan 988
Bending buckling of an elastoplastic cylindrical shell with a cutout
M.-K. Yeh, M.-C. Lin and W.-T. Wu 996
Wind, terrain and structural damping characteristics under tropical cyclone conditions
J. Shanmugasundaram, P. Harikrishna, S. Gomathinayagam and N. Lakshmanan 1006
Dynamic performance of a curved cable-stayed bridge
J.M.W. Brownjohn, J. Lee and B. Cheong 1015
Local structural modification using mass and stiffness changes
T. Li and J. He 1028
Book reviews 1038
Calendar 1043
Erratum 1044

Number 12

Inverse stiffness design of shear-flexural building models including soil–structure interaction
I. Takewaki 1045
A simple model to assess the effect of soil shear resistance on the response of soil-buried structures under dynamic loads
A.N. Dancygier and Y.S. Karinski 1055
Modelling M-ϕ curves for standard beam-to-column connections
M.L. Chisala 1066
Modified predictive control of structures
L.L. Chung 1076
Synthesis of non-Gaussian wind pressure time series on low building roofs
K.S. Kumar and T. Stathopoulos 1086
Reliability-based fatigue design of wind-turbine rotor blades
K.O. Ronold, J. Wedel-Heinen and C.J. Christensen 1101
Full-scale dynamic testing of a steel frame building during construction
A.M. Memari, A.A. Aghakouchak, M.G. Ashtiany and M. Tiv 1115
Erratum 1128
Calendar 1129

Keyword Index

Active member
Active structural control, Control reliability, Control stability, Output feedback control, Seismic protection system, 341

Active structural control
Active member, Control reliability, Control stability, Output feedback control, Seismic protection system, 341
Predictive control, Structural dynamics, Earthquake engineering, 1076

Actuators
Analytical solutions, Classical plate theory, Composite laminates, Finite element models, Piezoelectric materials, Shear deformation theories, Sensors, 568

Adjacent buildings
Fluid joint damper, Earthquake excitation, Pseudo-excitation algorithm, Parametric study, 135

Advanced analysis
Analysis program, Frame design, Practical method, Steel frame, 352

Aerodynamic stability
Cable-stayed bridges, Very long spans, Dynamic response to turbulent wind, Cable vibration, Flexible decks, Extradossed bridges, Multispan cable-stayed bridges, 737

Ambient vibration
Forced vibration, Infill walls, Autoclaved cellular concrete, Seismic loads, 1115

Analysis program
Advanced analysis, Frame design, Practical method, Steel frame, 352
Analytical
Shear deformation, Reinforced concrete, Frames, Joint element, Damage, Seismic, Rehabilitation, 971
Analytical/experimental studies
Timber bridges, Historic bridges, Seismic analysis, 877
Analytical solutions
Actuators, Classical plate theory, Composite laminates, Finite element models, Piezoelectric materials, Shear deformation theories, Sensors, 568
Arch bridges
Design optimization, Genetic algorithms (GAs), 75
Arching
Buried structures, Dynamic arching, Impact, Soil–structure interaction, 1055
Buried structures, Dynamic arching, Soil-structure interaction, Vibrations, 416
Asymmetric-monosymmetric
Elastic bars, Open thin-walled cross-sections, Flexural-torsional, Postbuckling, Central compression, 55
Asymmetry
Eccentricity, Inelastic, Earthquake, 856
Autoclaved cellular concrete
Forced vibration, Ambient vibration, Infill walls, Seismic loads, 1115
Axial strain at the peak stress
Concrete, Confinement effect, Interlocking spirals, Single spirals, Strength, 945
Axially compressed conical panels
Elastic buckling, Imperfection sensitivity, 845

Base-isolated structure
Shaking table test, Pseudodynamic test, Seismic analysis, Seismic performance, Damping of base isolator, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365
Beam–string–structure
Clopen structure, Self-balancing system, 795
Beams
Concrete, Creep, Shrinkage, Deflection, Long-term, 168
Behaviour (response reduction) factors
Inelastic spectra, Overstrength, Greek earthquakes, 823
Bending
Shell roofs, Prestress, Stretching, Truss model, Bending theory, Membrane hypothesis, 16
Stretching, Two-surface theory, Bending theory, Membrane hypothesis, 538
Bending buckling
Cylindrical shell, Cutout, Finite element method, Bending experiment, 996
Bending experiment
Bending buckling, Cylindrical shell, Cutout, Finite element method, 996
Bending theory
Bending, Stretching, Two-surface theory, Membrane hypothesis, 538
Shell roofs, Prestress, Bending, Stretching, Truss model, Membrane hypothesis, 16
Bilateral buckling
Buckling, Contact problems, Elasticity, Energy method, Shear, Unilateral restraint, Unilateral buckling, 443
Bilinear hysteresis model
Shaking table test, Pseudodynamic test, Seismic analysis, Seismic performance, Base-isolated structure, Damping of base isolator, Scaled specimen, Prototype specimen, 365
Bolted moment connections
Cold formed steel, Laboratory tests, 898
Bridge
High speed train, Rail bridge, Resonance, Riding comfort, 836
Bridges
Case-based reasoning, Design, 219
Buckling
Bilateral buckling, Contact problems, Elasticity, Energy method, Shear, Unilateral restraint, Unilateral buckling, 443
Ringbeams, Rings, Distortional buckling, Stability, T-section, Silos, Shells, 615
Ringbeams, Rings, Stability, T-section, Silos, Shells, 889
Buckling strength
Space structures, 395
Buried structures
Arching, Dynamic arching, Impact, Soil–structure interaction, 1055
Arching, Dynamic arching, Soil-structure interaction, Vibrations, 416

Cable dome
Nonlinear programming, Optimization, Shape optimization, Tensegrity, 719
Cable stayed bridge
Finite element analysis, Structural dynamics, 1015
Cable-stayed bridge
Spectral analysis, Random ground motion, Multi-support excitations, 62
Cable-stayed bridges
Very long spans, Aerodynamic stability, Dynamic response to turbulent wind, Cable vibration, Flexible decks, Extradossed bridges, Multispan cable-stayed bridges, 737
Cable structure
Hybrid structure, Tension structure, 726
Double membrane air-supported structure, Wind tunnel test, Shape analysis, Geometrical nonlinear analysis, Static loading test, Deflation analysis, On-site measurements, 786
Cable vibration
Cable-stayed bridges, Very long spans, Aerodynamic stability, Dynamic response to turbulent wind, Flexible decks, Extradossed bridges, Multispan cable-stayed bridges, 737
Case-based reasoning
Bridges, Design, 219
Central compression
Elastic bars, Open thin-walled cross-sections, Asymmetric-monosymmetric, Flexural-torsional, Postbuckling, 55
Circular sewer linings
Installation conditions, Temporary restraints, 5
Classical plate theory
Actuators, Analytical solutions, Composite laminates, Finite element models, Piezoelectric materials, Shear deformation theories, Sensors, 568
Clopen structure
Beam–string–structure, Self-balancing system, 795
Code calibration
Wind turbines, Rotor blades, Fatigue, Structural reliability, Partial safety factors, 1101
Cold formed steel
Bolted moment connections, Laboratory tests, 898
Collapse
Mechanism, Optimisation, Slabs, Yield-lines, 488
Collapse analysis
Damage mechanics, Nonlinear frame analysis, Steel structures, 954
Composite
Dynamic instability, Finite element, Elastic foundation, 988
Composite beam
Shear, Steel, Concrete, Plate reinforcement, 232
Hanging roof, Glulam and steel plate, Dynamic behavior, Dynamic wind load, 770
Composite floor slabs
Fire resistance, Fire tests, Spalÿling, Profiled steel sheets, 176
Composite laminates
Actuators, Analytical solutions, Classical plate theory, Finite element models, Piezoelectric materials, Shear deformation theories, Sensors, 568
Composite material
Finite elements, Rebar element, Enhanced assumed strain method, Prestressed concrete, 209
Conceptual design
Formfinding, Shapefinding, Figures of equilibrium, Force-densities, 709
Concrete
Creep, Shrinkage, Deflection, Beams, Long-term, 168
Shear, Steel, Composite beam, Plate reinforcement, 232
Axial strain at the peak stress, Confinement effect, Interlocking spirals, Single spirals, Strength, 945
Concrete gravity dams
Dam–reservoir interaction, Nonlinear analysis, Seismic energy response, Staggered method, 306
Concrete modelling
Reinforced concrete, Structural walls, Hysteretic behaviour, Shear behaviour, Macro models, 912
Confined concrete
Uncertainty analysis, Model uncertainty, Ductility, Ultimate concrete strain, 195
Confinement effect
Axial strain at the peak stress, Concrete, Interlocking spirals, Single spirals, Strength, 945
Connection effective length (thickness)
Flexible beam connections, Moment–rotation curve, Rotational stiffness (resistance), Model parameters, 1066

Constitutive equation
Fabric membrane, Fabric lattice model, 691
Contact problems
Bilateral buckling, Buckling, Elasticity, Energy method, Shear, Unilateral restraint, Unilateral buckling, 443
Continuum dynamic problem formulation
Earthquake response, Soil-structure interaction, 332
Control reliability
Active member, Active structural control, Control stability, Output feedback control, Seismic protection system, 341
Control stability
Active member, Active structural control, Control reliability, Output feedback control, Seismic protection system, 341
Corrugated plate
Finite element method, Static analysis, Dynamic analysis, Equivalent orthotropic plate, 277
Crack control
Steel fibre reinforced concrete, Cracking/ultimate shear strength, Ductility, 937
Cracking/ultimate shear strength
Steel fibre reinforced concrete, Ductility, Crack control, 937
Creep
Concrete, Shrinkage, Deflection, Beams, Long-term, 168
Cutout
Bending buckling, Cylindrical shell, Finite element method, Bending experiment, 996
Cyclic loads
Reinforced masonry, Earthquake resistant design, Masonry walls, Ductility, 99
Cylindrical shell
Bending buckling, Cutout, Finite element method, Bending experiment, 996

Damage
Shear deformation, Reinforced concrete, Frames, Analytical, Joint element, Seismic, Rehabilitation, 971
Damage mechanics
Collapse analysis, Nonlinear frame analysis, Steel structures, 954
Damping of base isolator
Shaking table test, Pseudodynamic test, Seismic analysis, Seismic performance, Base-isolated structure, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365
Dams
Roller compacted concrete, Rehabilitation, 497
Dam–reservoir interaction
Concrete gravity dams, Nonlinear analysis, Seismic energy response, Staggered method, 306
Deep water
Floating production system, Riser stress compensation, Motion suppression, 112
Deflation analysis
Double membrane air-supported structure, Cable structure, Wind tunnel test, Shape analysis, Geometrical nonlinear analysis, Static loading test, On-site measurements, 786
Deflection
Concrete, Creep, Shrinkage, Beams, Long-term, 168
Design
Case-based reasoning, Bridges, 219
Design optimization
Genetic algorithms (GAs), Arch bridges, 75
Detail design
String, String structure, Hybrid string structure, Tensile force of string, Structural design, 756
Direct electricity generation
Solar electricity generation, Tension structures, Solar chimney, Metal membrane solar concentrator, 658
Distortional buckling
Ringbeams, Rings, Buckling, Stability, T-section, Silos, Shells, 615
Domes
Tensile structures, Fabrics, Stadiums, 669
Double membrane air-supported structure
Cable structure, Wind tunnel test, Shape analysis, Geometrical nonlinear analysis, Static loading test, Deflation analysis, On-site measurements, 786
Ductile fracture
Geometric parameters, Pipelines, 924
Ductility
Reinforced masonry, Earthquake resistant design, Masonry walls, Cyclic loads, 99
Confined concrete, Uncertainty analysis, Model uncertainty, Ultimate concrete strain, 195
Nonconvex optimization, Nonmonotone moment–rotation curves, 810
Steel fibre reinforced concrete, Cracking/ultimate shear strength, Crack control, 937
Dynamic analysis
Finite element method, Static analysis, Corrugated plate, Equivalent orthotropic plate, 277
Dynamic arching
Arching, Buried structures, Impact, Soil–structure interaction, 1055
Arching, Buried structures, Soil-structure interaction, Vibrations, 416
Dynamic behavior
Hanging roof, Composite beam, Glulam and steel plate, Dynamic wind load, 770
Dynamic characteristics
Structural modification, Modal analysis, Frequency response functions, Inverse problem, 1028
Dynamic instability
Composite, Finite element, Elastic foundation, 988
Dynamic relaxation
Tension structures, Membrane design, Membrane engineer, 680
Dynamic response to turbulent wind
Cable-stayed bridges, Very long spans, Aerodynamic stability, Cable vibration, Flexible decks, Extradossed bridges, Multispan cable-stayed bridges, 737
Dynamic wind load
Hanging roof, Composite beam, Glulam and steel plate, Dynamic behavior, 770

Earthquake
Asymmetry, Eccentricity, Inelastic, 856
Earthquake engineering
Predictive control, Active structural control, Structural dynamics, 1076
Earthquake excitation
Adjacent buildings, Fluid joint damper, Pseudo-excitation algorithm, Parametric study, 135
Earthquake resistant design
Reinforced masonry, Masonry walls, Ductility, Cyclic loads, 99
Earthquake response
Soil-structure interaction, Continuum dynamic problem formulation, 332
Eccentricity
Asymmetry, Inelastic, Earthquake, 856
Elastic bars
Open thin-walled cross-sections, Asymmetric-monosymmetric, Flexural-torsional, Postbuckling, Central compression, 55
Elastic buckling
Axially compressed conical panels, Imperfection sensitivity, 845
Elastic foundation
Dynamic instability, Composite, Finite element, 988
Elasticity
Bilateral buckling, Buckling, Contact problems, Energy method, Shear, Unilateral restraint, Unilateral buckling, 443
Energy dissipation devices
Seismic strengthening, Supplemental damping, 603
Energy method
Bilateral buckling, Buckling, Contact problems, Elasticity, Shear, Unilateral restraint, Unilateral buckling, 443
Enhanced assumed strain method
Finite elements, Rebar element, Prestressed concrete, Composite material, 209
Equivalent orthotropic plate
Finite element method, Static analysis, Dynamic analysis, Corrugated plate, 277
Extradossed bridges
Cable-stayed bridges, Very long spans, Aerodynamic stability, Dynamic response to turbulent wind, Cable vibration, Flexible decks, Multispan cable-stayed bridges, 737

Fabric lattice model
Fabric membrane, Constitutive equation, 691
Fabric membrane
Fabric lattice model, Constitutive equation, 691
Fabrics
Tensile structures, Stadiums, Domes, 669
Fatigue
Railway bridges, Orthotropic decks, 639
Wind turbines, Rotor blades, Structural reliability, Code calibration, Partial safety factors, 1101
Field measurement
Wind pressure, Wind-tunnel test, Low building, Roof corner, Structural loads, 629
Field measurements
Terrain characteristics, Tropical cyclone winds, 1006
Figures of equilibrium
Formfinding, Shapefinding, Force-densities, Conceptual design, 709
Finite element
Dynamic instability, Composite, Elastic foundation, 988
Finite elements
Rebar element, Enhanced assumed strain method, Prestressed concrete, Composite material, 209
Spline functions, Flat shells, Transient analysis, 255
Finite element analysis
Cable stayed bridge, Structural dynamics, 1015
Finite element method
Static analysis, Dynamic analysis, Corrugated plate, Equivalent orthotropic plate, 277
Bending buckling, Cylindrical shell, Cutout, Bending experiment, 996
Finite element models
Actuators, Analytical solutions, Classical plate theory, Composite laminates, Piezoelectric materials, Shear deformation theories, Sensors, 568
Fire resistance
Composite floor slabs, Fire tests, Spalÿling, Profiled steel sheets, 176
Fire tests
Composite floor slabs, Fire resistance, Spalÿling, Profiled steel sheets, 176
Flat shells
Spline functions, Finite elements, Transient analysis, 255
Flexible beam connections
Moment–rotation curve, Rotational stiffness (resistance), Connection effective length (thickness), Model parameters, 1066
Flexible decks
Cable-stayed bridges, Very long spans, Aerodynamic stability, Dynamic response to turbulent wind, Cable vibration, Extradossed bridges, Multispan cable-stayed bridges, 737
Flexibly connected frames
Modal responses, Seismic analysis, Semirigid connections, 425
Flexural-torsional
Elastic bars, Open thin-walled cross-sections, Asymmetric-monosymmetric, Postbuckling, Central compression, 55
Floating production system
Riser stress compensation, Deep water, Motion suppression, 112
Fluid joint damper
Adjacent buildings, Earthquake excitation, Pseudo-excitation algorithm, Parametric study, 135
Force-densities
Formfinding, Shapefinding, Figures of equilibrium, Conceptual design, 709
Force limiting devices
Space trusses, 34
Forced vibration
Ambient vibration, Infill walls, Autoclaved cellular concrete, Seismic loads, 1115
Formfinding
Shapefinding, Figures of equilibrium, Force-densities, Conceptual design, 709
Frame design
Advanced analysis, Analysis program, Practical method, Steel frame, 352
Frames
Lumped plasticity, Geometric nonlinearity, Softening, 557
Shear deformation, Reinforced concrete, Analytical, Joint element, Damage, Seismic, Rehabilitation, 971
Free vibration
Tall buildings, Plates, Natural frequencies, Mode shapes, 507
Frequency response functions
Structural modification, Modal analysis, Dynamic characteristics, Inverse problem, 1028

Generalized differential quadrature
Vibration analysis, Mixed boundary conditions, Nonuniform boundary conditions, Rectangular plates, 125
Genetic algorithms (GAs)
Design optimization, Arch bridges, 75
Geometric nonlinearity
Frames, Lumped plasticity, Softening, 557
Geometric parameters
Ductile fracture, Pipelines, 924
Geometrical nonlinear analysis
Double membrane air-supported structure, Cable structure, Wind tunnel test, Shape analysis, Static loading test, Deflation analysis, On-site measurements, 786
Glulam and steel plate
Hanging roof, Composite beam, Dynamic behavior, Dynamic wind load, 770
Greek earthquakes
Behaviour (response reduction) factors, Inelastic spectra, Overstrength, 823

Hanging roof
Composite beam, Glulam and steel plate, Dynamic behavior, Dynamic wind load, 770
High speed train
Bridge, Rail bridge, Resonance, Riding comfort, 836
Hip-truncated combined parabolical cylinder roof
Nonlinear analysis, Structural comparison, 267
Historic bridges
Timber bridges, Analytical/experimental studies, Seismic analysis, 877
Hybrid inverse problem
Stiffness design, Shear-flexural building model, Soil–pile–structure interaction, Substructure modeling, Response spectrum method, 1045
Hybrid string structure
String, String structure, Tensile force of string, Structural design, Detail design, 756
Hybrid structure
Tension structure, Cable structure, 726
Hysteretic behaviour
Reinforced concrete, Structural walls, Shear behaviour, Macro models, Concrete modelling, 912

Impact
Arching, Buried structures, Dynamic arching, Soil–structure interaction, 1055
Imperfection sensitivity
Axially compressed conical panels, Elastic buckling, 845
Inelastic
Asymmetry, Eccentricity, Earthquake, 856
Inelastic spectra
Behaviour (response reduction) factors, Overstrength, Greek earthquakes, 823
Infill walls
Forced vibration, Ambient vibration, Autoclaved cellular concrete, Seismic loads, 1115
Installation conditions
Circular sewer linings, Temporary restraints, 5
Integrated optimization
Intelligent structures, Piezoelectric sensors and actuators, 183
Intelligent structures
Integrated optimization, Piezoelectric sensors and actuators, 183
Interlocking spirals
Axial strain at the peak stress, Concrete, Confinement effect, Single spirals, Strength, 945
Inverse problem
Structural modification, Modal analysis, Frequency response functions, Dynamic characteristics, 1028

Jack-up units
Spudcan footings, Wave loading, Non-linear dynamic analysis, 383
Joint element
Shear deformation, Reinforced concrete, Frames, Analytical, Damage, Seismic, Rehabilitation, 971

LCVA
TMD, TLCD, Mass dampers, Passive control, 454
Laboratory tests
Cold formed steel, Bolted moment connections, 898
Laminated rubber bearing
Seismic isolation, *P*-delta effects, Ultimate behavior, Macro-model, 594
Large displacements
Self-stress, Tensegrity systems, Non-linear behaviour, 864
Limit analysis
Loading path, Mathematical programming, Reference stress, 530
Loading path
Limit analysis, Mathematical programming, Reference stress, 530
Long-term
Concrete, Creep, Shrinkage, Deflection, Beams, 168
Low building
Wind pressure, Field measurement, Wind-tunnel test, Roof corner, Structural loads, 629
Low building roofs
Non-Gaussian, Synthesis, Time series, Wind pressure, 1086
Lumped plasticity
Frames, Geometric nonlinearity, Softening, 557

Macro-model
Seismic isolation, Laminated rubber bearing, *P*-delta effects, Ultimate behavior, 594
Macro models
Reinforced concrete, Structural walls, Hysteretic behaviour, Shear behaviour, Concrete modelling, 912
Masonry walls
Reinforced masonry, Earthquake resistant design, Ductility, Cyclic loads, 99
Mass dampers
TMD, LCVA, TLCD, Passive control, 454
Mathematical programming
Limit analysis, Loading path, Reference stress, 530
Mechanism
Collapse, Optimisation, Slabs, Yield-lines, 488
Membrane design
Tension structures, Dynamic relaxation, Membrane engineer, 680
Membrane engineer
Tension structures, Dynamic relaxation, Membrane design, 680
Membrane hypothesis
Bending, Stretching, Two-surface theory, Bending theory, 538
Shell roofs, Prestress, Bending, Stretching, Truss model, Bending theory, 16
Metal membrane solar concentrator
Solar electricity generation, Tension structures, Solar chimney, Direct electricity generation, 658
Mixed boundary conditions
Generalized differential quadrature, Vibration analysis, Nonuniform boundary conditions, Rectangular plates, 125
Modal analysis
Structural modification, Frequency response functions, Dynamic characteristics, Inverse problem, 1028
Modal responses
Flexibly connected frames, Seismic analysis, Semirigid connections, 425
Mode localization
Multispan cable systems, Transmission lines, 45
Mode shapes
Free vibration, Tall buildings, Plates, Natural frequencies, 507
Model parameters
Flexible beam connections, Moment–rotation curve, Rotational stiffness (resistance), Connection effective length (thickness), 1066
Model uncertainty
Confined concrete, Uncertainty analysis, Ductility, Ultimate concrete strain, 195

Moment–rotation curve
Flexible beam connections, Rotational stiffness (resistance), Connection effective length (thickness), Model parameters, 1066
Motion suppression
Floating production system, Riser stress compensation, Deep water, 112
Multi-support excitations
Cable-stayed bridge, Spectral analysis, Random ground motion, 62
Multilevel optimization
Multiobjective optimization, Steel frames, Structural engineering, 519
Multiobjective optimization
Multilevel optimization, Steel frames, Structural engineering, 519
Multiple tuned liquid column dampers
Tuned liquid column damper, Structural vibration, Vibration control, Optimisation, 316
Multispan cable-stayed bridges
Cable-stayed bridges, Very long spans, Aerodynamic stability, Dynamic response to turbulent wind, Cable vibration, Flexible decks, Extradossed bridges, 737
Multispan cable systems
Mode localization, Transmission lines, 45

Natural frequencies
Free vibration, Tall buildings, Plates, Mode shapes, 507
Non-Gaussian
Low building roofs, Synthesis, Time series, Wind pressure, 1086
Non-linear behaviour
Self-stress, Large displacements, Tensegrity systems, 864
Non-linear dynamic analysis
Jack-up units, Spudcan footings, Wave loading, 383
Nonconvex optimization
Ductility, Nonmonotone moment–rotation curves, 810
Nonlinear analysis
Hip-truncated combined parabolical cylinder roof, Structural comparison, 267
Concrete gravity dams, Dam–reservoir interaction, Seismic energy response, Staggered method, 306
Nonlinear frame analysis
Damage mechanics, Collapse analysis, Steel structures, 954
Nonlinear programming
Cable dome, Optimization, Shape optimization, Tensegrity, 719
Nonmonotone moment–rotation curves
Nonconvex optimization, Ductility, 810
Nonuniform boundary conditions
Generalized differential quadrature, Vibration analysis, Mixed boundary conditions, Rectangular plates, 125

On-site measurements
Double membrane air-supported structure, Cable structure, Wind tunnel test, Shape analysis, Geometrical nonlinear analysis, Static loading test, Deflation analysis, 786
Open thin-walled cross-sections
Elastic bars, Asymmetric-monosymmetric, Flexural-torsional, Post-buckling, Central compression, 55
Optimisation
Tuned liquid column damper, Multiple tuned liquid column dampers, Structural vibration, Vibration control, 316
Collapse, Mechanism, Slabs, Yield-lines, 488
Cable dome, Nonlinear programming, Shape optimization, Tensegrity, 719
Orthotropic decks
Railway bridges, Fatigue, 639
Output feedback control
Active member, Active structural control, Control reliability, Control stability, Seismic protection system, 341
Overstrength
Behaviour (response reduction) factors, Inelastic spectra, Greek earthquakes, 823

***P*-delta effects**
Seismic isolation, Laminated rubber bearing, Ultimate behavior, Macro-model, 594
Parametric study
Adjacent buildings, Fluid joint damper, Earthquake excitation, Pseudo-excitation algorithm, 135

Partial safety factors
Wind turbines, Rotor blades, Fatigue, Structural reliability, Code calibration, 1101
Passive control
TMD, LCVA, TLCD, Mass dampers, 454
Piezoelectric materials
Actuators, Analytical solutions, Classical plate theory, Composite laminates, Finite element models, Shear deformation theories, Sensors, 568
Piezoelectric sensors and actuators
Intelligent structures, Integrated optimization, 183
Pipelines
Ductile fracture, Geometric parameters, 924
Plasterboard
Seismic response, Steel domestic structures, Wall frames, 83
Plate reinforcement
Shear, Steel, Concrete, Composite beam, 232
Plates
Free vibration, Tall buildings, Natural frequencies, Mode shapes, 507
Postbuckling
Elastic bars, Open thin-walled cross-sections, Asymmetric-monosymmetric, Flexural-torsional, Central compression, 55
Practical method
Advanced analysis, Analysis program, Frame design, Steel frame, 352
Predictive control
Active structural control, Structural dynamics, Earthquake engineering, 1076
Prestress
Shell roofs, Bending, Stretching, Truss model, Bending theory, Membrane hypothesis, 16
Prestressed concrete
Finite elements, Rebar element, Enhanced assumed strain method, Composite material, 209
Profiled steel sheets
Composite floor slabs, Fire resistance, Fire tests, Spalÿling, 176
Prototype specimen
Shaking table test, Pseudodynamic test, Seismic analysis, Seismic performance, Base-isolated structure, Damping of base isolator, Scaled specimen, Bilinear hysteresis model, 365
Pseudodynamic test
Shaking table test, Seismic analysis, Seismic performance, Base-isolated structure, Damping of base isolator, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365
Pseudo-excitation algorithm
Adjacent buildings, Fluid joint damper, Earthquake excitation, Parametric study, 135

Rail bridge
Bridge, High speed train, Resonance, Riding comfort, 836
Railway bridges
Orthotropic decks, Fatigue, 639
Random ground motion
Cable-stayed bridge, Spectral analysis, Multi-support excitations, 62
Rebar element
Finite elements, Enhanced assumed strain method, Prestressed concrete, Composite material, 209
Rectangular plates
Generalized differential quadrature, Vibration analysis, Mixed boundary conditions, Nonuniform boundary conditions, 125
Reference stress
Limit analysis, Loading path, Mathematical programming, 530
Rehabilitation
Roller compacted concrete, Dams, 497
Shear deformation, Reinforced concrete, Frames, Analytical, Joint element, Damage, Seismic, 971
Reinforced concrete
Structural walls, Hysteretic behaviour, Shear behaviour, Macro models, Concrete modelling, 912
Shear deformation, Frames, Analytical, Joint element, Damage, Seismic, Rehabilitation, 971
Reinforced masonry
Earthquake resistant design, Masonry walls, Ductility, Cyclic loads, 99
Resonance
Bridge, High speed train, Rail bridge, Riding comfort, 836
Response spectrum method
Stiffness design, Shear-flexural building model, Hybrid inverse problem, Soil–pile–structure interaction, Substructure modeling, 1045
Riding comfort
Bridge, High speed train, Rail bridge, Resonance, 836
Ringbeams
Rings, Distortional buckling, Buckling, Stability, T-section, Silos, Shells, 615
Rings, Buckling, Stability, T-section, Silos, Shells, 889
Rings
Ringbeams, Distortional buckling, Buckling, Stability, T-section, Silos, Shells, 615
Ringbeams, Buckling, Stability, T-section, Silos, Shells, 889
Riser stress compensation
Floating production system, Deep water, Motion suppression, 112
Roller compacted concrete
Rehabilitation, Dams, 497
Roof corner
Wind pressure, Field measurement, Wind-tunnel test, Low building, Structural loads, 629
Rotational stiffness (resistance)
Flexible beam connections, Moment–rotation curve, Connection effective length (thickness), Model parameters, 1066
Rotor blades
Wind turbines, Fatigue, Structural reliability, Code calibration, Partial safety factors, 1101

Scaled specimen
Shaking table test, Pseudodynamic test, Seismic analysis, Seismic performance, Base-isolated structure, Damping of base isolator, Prototype specimen, Bilinear hysteresis model, 365
Seismic
Shear deformation, Reinforced concrete, Frames, Analytical, Joint element, Damage, Rehabilitation, 971
Seismic analysis
Shaking table test, Pseudodynamic test, Seismic performance, Base-isolated structure, Damping of base isolator, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365
Flexibly connected frames, Modal responses, Semirigid connections, 425
Timber bridges, Historic bridges, Analytical/experimental studies, 877
Seismic energy response
Concrete gravity dams, Dam–reservoir interaction, Nonlinear analysis, Staggered method, 306
Seismic isolation
Laminated rubber bearing, *P*-delta effects, Ultimate behavior, Macromodel, 594
Seismic loads
Forced vibration, Ambient vibration, Infill walls, Autoclaved cellular concrete, 1115
Seismic performance
Shaking table test, Pseudodynamic test, Seismic analysis, Base-isolated structure, Damping of base isolator, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365
Seismic protection system
Active member, Active structural control, Control reliability, Control stability, Output feedback control, 341
Seismic protection
Structural control, Semi-active control, 469
Seismic response
Steel domestic structures, Wall frames, Plasterboard, 83
Seismic strengthening
Energy dissipation devices, Supplemental damping, 603
Self-balancing system
Beam–string–structure, Clopen structure, 795
Self-stress
Large displacements, Tensegrity systems, Non-linear behaviour, 864
Semi-active control
Structural control, Seismic protection, 469
Semirigid connections
Flexibly connected frames, Modal responses, Seismic analysis, 425
Sensors
Actuators, Analytical solutions, Classical plate theory, Composite laminates, Finite element models, Piezoelectric materials, Shear deformation theories, 568
Shaking table test
Pseudodynamic test, Seismic analysis, Seismic performance, Base-isolated structure, Damping of base isolator, Scaled specimen, Prototype specimen, Bilinear hysteresis model, 365

Shape analysis
Double membrane air-supported structure, Cable structure, Wind tunnel test, Geometrical nonlinear analysis, Static loading test, Deflation analysis, On-site measurements, 786
Shape optimization
Cable dome, Nonlinear programming, Optimization, Tensegrity, 719
Shapefinding
Formfinding, Figures of equilibrium, Force-densities, Conceptual design, 709
Shear
Steel, Concrete, Composite beam, Plate reinforcement, 232
Bilateral buckling, Buckling, Contact problems, Elasticity, Energy method, Unilateral restraint, Unilateral buckling, 443
Shear behaviour
reinforced concrete, Structural walls, Hysteretic behaviour, Macro models, Concrete modelling, 912
Shear deformation
Reinforced concrete, Frames, Analytical, Joint element, Damage, Seismic, Rehabilitation, 971
Shear deformation theories
Actuators, Analytical solutions, Classical plate theory, Composite laminates, Finite element models, Piezoelectric materials, Sensors, 568
Shear-flexural building model
Stiffness design, Hybrid inverse problem, Soil–pile–structure interaction, Substructure modeling, Response spectrum method, 1045
Shell roofs
Prestress, Bending, Stretching, Truss model, Bending theory, Membrane hypothesis, 16
Shells
Ringbeams, Rings, Distortional buckling, Buckling, Stability, T-section, Silos, 615
Ringbeams, Rings, Buckling, Stability, T-section, Silos, 889
Shrinkage
Concrete, Creep, Deflection, Beams, Long-term, 168
Silos
Ringbeams, Rings, Distortional buckling, Buckling, Stability, T-section, Shells, 615
Ringbeams, Rings, Buckling, Stability, T-section, Shells, 889
Single spirals
Axial strain at the peak stress, Concrete, Confinement effect, Interlocking spirals, Strength, 945
Slabs
Collapse, Mechanism, Optimisation, Yield-lines, 488
Softening
Frames, Lumped plasticity, Geometric nonlinearity, 557
Soil-structure interaction
Earthquake response, Continuum dynamic problem formulation, 332
Arching, Buried structures, Dynamic arching, Vibrations, 416
Arching, Buried structures, Dynamic arching, Impact, 1055
Soil–pile–structure interaction
Stiffness design, Shear-flexural building model, Hybrid inverse problem, Substructure modeling, Response spectrum method, 1045
Solar chimney
Solar electricity generation, Tension structures, Direct electricity generation, Metal membrane solar concentrator, 658
Solar electricity generation
Tension structures, Solar chimney, Direct electricity generation, Metal membrane solar concentrator, 658
Space structures
Buckling strength, 395
Space trusses
Force limiting devices, 34
Spalling
Composite floor slabs, Fire resistance, Fire tests, Profiled steel sheets, 176
Spectral analysis
Cable-stayed bridge, Random ground motion, Multi-support excitations, 62
Spline functions
Finite elements, Flat shells, Transient analysis, 255
Spudcan footings
Jack-up units, Wave loading, Non-linear dynamic analysis, 383
Stability
Ringbeams, Rings, Distortional buckling, Buckling, T-section, Silos, Shells, 615
Ringbeams, Rings, Buckling, T-section, Silos, Shells, 889
Stadiums
Tensile structures, Fabrics, Domes, 669
Staggered method
Concrete gravity dams, Dam–reservoir interaction, Nonlinear analysis, Seismic energy response, 306
Static analysis
Finite element method, Dynamic analysis, Corrugated plate, Equivalent orthotropic plate, 277
Static loading test
Double membrane air-supported structure, Cable structure, Wind tunnel test, Shape analysis, Geometrical nonlinear analysis, Deflation analysis, On-site measurements, 786
Steel
Shear, Concrete, Composite beam, Plate reinforcement, 232
Steel domestic structures
Seismic response, Wall frames, Plasterboard, 83
Steel fibre reinforced concrete
Cracking/ultimate shear strength, Ductility, Crack control, 937
Steel frame
Advanced analysis, Analysis program, Frame design, Practical method, 352
Steel frames
Multiobjective optimization, Multilevel optimization, Structural engineering, 519
Steel structures
Damage mechanics, Collapse analysis, Nonlinear frame analysis, 954
Stiffness design
Shear-flexural building model, Hybrid inverse problem, Soil–pile–structure interaction, Substructure modeling, Response spectrum method, 1045
Strength
Axial strain at the peak stress, Concrete, Confinement effect, Interlocking spirals, Single spirals, 945
Stretching
Bending, Two-surface theory, Bending theory, Membrane hypothesis, 538
Shell roofs, Prestress, Bending, Truss model, Bending theory, Membrane hypothesis, 16
String
String structure, Hybrid string structure, Tensile force of string, Structural design, Detail design, 756
String structure
String, Hybrid string structure, Tensile force of string, Structural design, Detail design, 756
Structural comparison
Hip-truncated combined parabolical cylinder roof, Nonlinear analysis, 267
Structural control
Semi-active control, Seismic protection, 469
Structural design
String, String structure, Hybrid string structure, Tensile force of string, Detail design, 756
Structural dynamics
Cable stayed bridge, Finite element analysis, 1015
Predictive control, Active structural control, Earthquake engineering, 1076
Structural engineering
Multiobjective optimization, Multilevel optimization, Steel frames, 519
Structural loads
Wind pressure, Field measurement, Wind-tunnel test, Low building, Roof corner, 629
Structural modification
Modal analysis, Frequency response functions, Dynamic characteristics, Inverse problem, 1028
Structural reliability
Wind turbines, Rotor blades, Fatigue, Code calibration, Partial safety factors, 1101
Structural vibration
Tuned liquid column damper, Multiple tuned liquid column dampers, Vibration control, Optimisation, 316
Structural walls
Reinforced concrete, Hysteretic behaviour, Shear behaviour, Macro models, Concrete modelling, 912
Substructure modeling
Stiffness design, Shear-flexural building model, Hybrid inverse problem, Soil–pile–structure interaction, Response spectrum method, 1045
Supplemental damping
Energy dissipation devices, Seismic strengthening, 603

Synthesis
Low building roofs, Non-Gaussian, Time series, Wind pressure, 1086

T-section
Ringbeams, Rings, Distortional buckling, Buckling, Stability, Silos, Shells, 615
Ringbeams, Rings, Buckling, Stability, Silos, Shells, 889
TLCD
TMD, LCVA, Mass dampers, Passive control, 454
TMD
LCVA, TLCD, Mass dampers, Passive control, 454
Tall buildings
Free vibration, Plates, Natural frequencies, Mode shapes, 507
Temporary restraints
Circular sewer linings, Installation conditions, 5
Tensegrity
Cable dome, Nonlinear programming, Optimization, Shape optimization, 719
Tensegrity systems
Self-stress, Large displacements, Non-linear behaviour, 864
Tensile force of string
String, String structure, Hybrid string structure, Structural design, Detail design, 756
Tensile structures
Fabrics, Stadiums, Domes, 669
Tension structure
Hybrid structure, Cable structure, 726
Tension structures
Solar electricity generation, Solar chimney, Direct electricity generation, Metal membrane solar concentrator, 658
Dynamic relaxation, Membrane design, Membrane engineer, 680
Terrain characteristics
Field measurements, Tropical cyclone winds, 1006
Timber bridges
Historic bridges, Analytical/experimental studies, Seismic analysis, 877
Time series
Low building roofs, Non-Gaussian, Synthesis, Wind pressure, 1086
Transient analysis
Spline functions, Finite elements, Flat shells, 255
Transmission lines
Mode localization, Multispan cable systems, 45
Tropical cyclone winds
Field measurements, Terrain characteristics, 1006
Truss model
Shell roofs, Prestress, Bending, Stretching, Bending theory, Membrane hypothesis, 16
Tuned liquid column damper
Multiple tuned liquid column dampers, Structural vibration, Vibration control, Optimisation, 316
Two-surface theory
Bending, Stretching, Bending theory, Membrane hypothesis, 538

Ultimate behavior
Seismic isolation, Laminated rubber bearing, *P*-delta effects, Macromodel, 594
Ultimate concrete strain
Confined concrete, Uncertainty analysis, Model uncertainty, Ductility, 195
Uncertainty analysis
Confined concrete, Model uncertainty, Ductility, Ultimate concrete strain, 195
Unilateral buckling
Bilateral buckling, Buckling, Contact problems, Elasticity, Energy method, Shear, Unilateral restraint, 443
Unilateral restraint
Bilateral buckling, Buckling, Contact problems, Elasticity, Energy method, Shear, Unilateral buckling, 443

Very long spans
Cable-stayed bridges, Aerodynamic stability, Dynamic response to turbulent wind, Cable vibration, Flexible decks, Extradossed bridges, Multispan cable-stayed bridges, 737
Vibration analysis
Generalized differential quadrature, Mixed boundary conditions, Nonuniform boundary conditions, Rectangular plates, 125
Vibration control
Tuned liquid column damper, Multiple tuned liquid column dampers, Structural vibration, Optimisation, 316
Vibrations
Arching, Buried structures, Dynamic arching, Soil-structure interaction, 416

Wall frames
Seismic response, Steel domestic structures, Plasterboard, 83
Wave loading
Jack-up units, Spudcan footings, Non-linear dynamic analysis, 383
Wind pressure
Field measurement, Wind-tunnel test, Low building, Roof corner, Structural loads, 629
Low building roofs, Non-Gaussian, Synthesis, Time series, 1086
Wind tunnel test
Double membrane air-supported structure, Cable structure, Shape analysis, Geometrical nonlinear analysis, Static loading test, Deflation analysis, On-site measurements, 786
Wind pressure, Field measurement, Low building, Roof corner, Structural loads, 629
Wind turbines
Rotor blades, Fatigue, Structural reliability, Code calibration, Partial safety factors, 1101

Yield-lines
